Summary

Computer Engineering student skilled in MERN stack development, REST APIs, and scalable backend systems. Experienced in building real-world full-stack applications with authentication, dashboards, and data-driven features. Strong problem-solving ability with 100+ DSA problems solved. Seeking a Full Stack Developer internship.

Education

Savitribai Phule Pune University (SPPU)	2023 – 2027
B.E. Computer Engineering	CGPA: 9.32/10
Class XII (HSC)	2023
Percentage: 76.12%	
Class X (SSC)	2021
Percentage: 88.60%	

Technical Skills

Languages: JavaScript, Python, Java, C++, SQL

Frontend: React, HTML, CSS, Tailwind

Backend: Node.js, Express.js, REST APIs, JWT, OAuth

Databases: MongoDB, MySQL

Tools: Git, GitHub, Postman, VS Code, Vercel, Render

Core: DSA, DBMS, OOP

Concepts: REST API Design, CRUD Operations, MVC Architecture, API Integration

Projects

Smart Reimbursement Management System	GitHub	Live
<i>MERN Stack, Machine Learning</i>		
– Built role-based workflow (Employee → Manager → Admin). – Implemented validation, real-time tracking, and receipt uploads. – Added ML-based anomaly detection for decision support. – Designed scalable modular backend improving system efficiency and maintainability. – Reduced manual processing effort by automating claim workflows and validations.		
AgriArya – Smart Farming Platform	GitHub	Live
<i>MERN Stack, Machine Learning</i>		
– Built crop recommendation, disease prediction, and AI chatbot. – Integrated real-time market insights and multilingual dashboard. – Designed scalable backend with REST APIs and MongoDB. – Improved decision-making for farmers through data-driven insights and automation. – Improved system efficiency by integrating real-time data processing and optimized backend workflows.		
SchemeMate – Government Scheme Portal	GitHub	
<i>Node.js, Express, MongoDB</i>		
– Built secure backend with authentication and RBAC. – Designed scalable APIs and efficient data models. – Structured data for fast retrieval and improved system performance.		

Experience

Full Stack Developer Intern	BrightPath Horizon, 2026
– Developed MERN applications implementing authentication, RBAC, and API integrations. – Designed scalable REST APIs handling structured data and improving system performance. – Contributed to AuthCore modules for secure user management and access control. – Optimized backend workflows improving response time and system efficiency. – Improved backend efficiency by optimizing API response time and query performance. – Reduced API response time by optimizing database queries and backend logic.	

Achievements

- Qualified GATE 2026 with strong fundamentals in Computer Science.
- Smart India Hackathon 2026 – 6th Rank (Waitlisted)
- Solved 100+ DSA problems on LeetCode
- Built and deployed full-stack MERN applications with live user interaction
- Participated in multiple hackathons and project competitions, building real-world solutions.
